Subject:Convoy-specific strategic assessments: Update

Deputy:

Quick update on our near-term production: two pieces on the go.

First: **Deeper dive on the DIAGALON group (Protected and Classified Versions)**. Assessment will focus on events in Alberta and ties/likelihood to NCR or elsewhere in Canada. Dissemination COB today/early Friday.

Note: National Div request to provide strategic context / expertise on this group to support their operational planning. Additionally, yesterday the PM had been pressured by the media to explain how they could equate what happened in K Div with the measures being applied here.

Second: **Broader threat environment assessment with a “what’s next” and “what else” focus.** Overview of new emerging threat space as protestors move out, and grievances persist, (what we can expect by way of new demonstration(s) or movement issues). Dissemination early next week.
